

# POP-UP RIGHT ANGLE TRANSFER

Allows for extra large pallets or panels to be transferred 90 degrees to a perpendicular conveyor line.

## Features:

- Standard Glide-Line conveyors with the addition of custom pop-up transfer unit.
- Allows for larger products or panels to be transferred 90 degrees to another conveyor system.
- Quick and seamless automated transfer of product between conveyor systems.
- Utilizes a single air cylinder and cam system, eliminating the need to sync multiple pop-up cylinders.
- Non-marking rollers to prevent unwanted marks and scuffs on product.

## Options:

- Size, number of strands, number of rollers.
